

Energy Savings

Your Heating and Air Conditioning system uses more energy as it ages. Here's what we do to lower your energy bill and improve your family's comfort

Clean Evaporator Coil

Dirt and airborne allergens like pollen can pass through the air filter and become attracted to the wet surface of an evaporator coil. Just 1/100th of an inch can increase operating costs 5%. Your energy bill goes up as dirt builds up

Clean Blower Wheel

The fan that blows air throughout your home can also get dirty. Cleaning a dirty blower wheel could lower heating and cooling costs by 5% or more.

Clean Outdoor Coil

There is no filter on the condenser coil. Every year, leaves, grass trimming, and dirt can reduce condenser airflow. The lower the condenser air flow, the higher your energy bill.

Check Refrigerant Charge

A study by Texas A&M University found that 90% of systems are not properly charged with refrigerant. An improperly charged system can lead to significantly lower efficiency ratings and SEER2 operating levels.

Seal Ductwork

When there are gaps/holes in the duct work, your cold/hot air leaks into the attic space instead of your home

Comfort and Peace of Mind

Improve Reliability & Reduce Major Repairs

A routine inspection and early replacement of electrical controls, mechanical parts, and refrigerant components can prevent major repairs in the future. Correcting Problems proactively can protect the compressor and improve the longevity of your unit.

Top Priority Service & Peace of Mind

We reduce your risk and worry by having eyes on your system multiple times a year, ensuring that you feel comfortable with your HVAC system. If you do have a problem, you will always get top priority with same-day to 24-hour service.

Protect the Health of Home and Residents

The air that you breathe in your home is constantly circulated. Leaks in the ductwork, poor filtration, dirty evaporator coils, mold in blower compartments, and the lack of UV air purification can reduce the internal air quality. Peak Performance includes cleaning these components and ensuring you are set up with the best air solutions.

Standard Protection Plan

\$15 / Month / Unit

\$180 / Year / Unit

Routine maintenance to ensure your system runs as efficiently as possible while catching potential issues early.

- **10% Repair Discount**
- **Within 24 Hour Priority Status**
- **2 Visits Per Year**
- **1 Year Repair Warranty**
- **25+ Point Inspection - Including Condensate Line and Outdoor Coil Cleaning**
- **Pre Season Scheduling**

Premium Protection Plan

\$25 / Month / Unit

\$300 / Year / Unit

Includes routine maintenance plus proactive part replacement to keep your system running reliably.

- **15% Repair Discount**
- **Within 24 Hour Priority Status**
- **2 Visits Per Year**
- **2 Year Repair Warranty**
- **25+ Point Inspection - Including Condensate Line and Outdoor Coil Cleaning**
- **Pre Season Scheduling**
- **Proactive Replacement as Needed to Prevent System Impact: Relay, Run Capacitor, 2 Fuses, or up to 1 lb of Refrigerant per Visit**

Elite Protection Plan

\$45 / Month / Unit

\$540 / Year / Unit

Total peace of mind coverage with comprehensive maintenance, proactive part replacements, and full-service care

- **15% Repair Discount**
- **Same Day Priority Status**
- **4 Visits Per Year**
- **5 Year Repair Warranty**
- **25+ Point Inspection - Including Condensate Line and Outdoor Coil Cleaning**
- **Pre Season Scheduling**
- **Proactive Replacement as Needed to Prevent System Impact: Relay, Run Capacitor, 2 Fuses, or up to 1 lb of Refrigerant per Visit**
- **Quarterly Pleated Filter Replacement**
- **Deep Cleaning of One of the Following Per Visit: Blower Wheel, Burner System, Chemically Clean Indoor Coil, Blower Compartment**

10% off each additional unit. Depending on your selected plan, you will receive guaranteed repair appointments, free services, and repair discounts. Plus, you will have McCall's 100% Satisfaction Guarantee assuring that the job is done right. Electronic air cleaners, humidifiers, UV lights, thermostats, and other accessories will be priced separately. Membership fee per each system. One year agreement is required. Some restrictions may apply. Please ask your representative for more details.
